

## 7 Superyachts Making Waves – Robb Report

*Michael Verdon*

1 минута

---

The vertical, beak-like plumb bow and extensive sweep of high windows at the stern give [Dynamiq](#)'s first launch, *Jetsetter*, a unique look. The 127-footer, designed by Azure Marine and Van Oossanen Naval Architects, boasts a superefficient hull shape that enables it to consume only 21 gallons of fuel per hour at 10 knots. The yacht's design is efficient, and Dynamiq's ordering process is transparent. The company's online configurator allows you to equip its yachts with specific interior packages and instantly receive a price and launch date. You can customize with Pratesi linens, Technogym equipment, Bowers & Wilkins sound systems, and dozens of other options. (Starting at \$15.4 million.)
