GTT 115 Hybrid superyacht by Dynamiq and Studio F.A Porsche

Aug 14, 2017 | By Robbie Wilson

2-3 минуты

The new range of yachts with Porsche's exterior styling will range in size from 85 to 115 feet and features hull lines by Vripack and naval architecture by Van Oossanen.

The latest [Dynamiq superyacht](#) has been developed with [Studio F.A. Porsche](#). At 35 metres in length, the GTT 115 Hybrid is fast for its size due to being manufactured out of

lightweight aluminium. The new range of yachts with Porsche's exterior styling will range in size from 85 to 115 feet and features hull lines by [Vripack](#) and naval architecture by Van Oossanen.

Twin 1213kW MAN engines with Fortjes 5000 pods propel the superyacht up to a top speed of 21 knots, while a range of 3,400 nautical miles means crossing the [Atlantic](#) and many other bodies of water is within the GT115 Hybrid's reach. Twin 45kW Fischer Panda variable-speed generators also allow for the utmost in comfort and quietness while anchored or moored.

Porsche's signature [Carrera](#) White colour is an option as well as Targa-style mullions and the transom design from the Mission E concept. And if you've seen the latest 911R, you'll notice the Pepita houndstooth pattern on the fabric centres of the deck cushions, a nod to the limited-edition [sports car](#).

The interior comes in three or four cabin guise, with Italian furniture designed by [Minotti](#). Brown and beige are prominent colours throughout, with the exception of the carbon fibre details. The limited-edition yacht – just seven will be made – is available within 15 months of the order date and prices start at €11.9 million. Thanks to an online configurator, purchasers can create the yacht of their dreams, quickly and easily online. The GT 115 will make her world debut at the 2017 [Monaco Yacht Show](#) with the first delivery also available in September.
